Objective

Seeking a challenging and rewarding opportunity with an organization of repute, which recognizes my true potential and effectively utilizes/nurtures my excellent analytical and technical skills. I am Passionate about IT and have the ability to quickly pick up and use new technologies, tools and software applications, which I have demonstrated by independently developing end to end web applications such as Student Information System, Techmator.com & Vishu.net which are based on PHP, MySQL & AJAX technologies.

Experience

Accenture Services Pvt. Ltd

April, 2011 - Present

I joined Accenture in April '11 as Associate Software Engineer and underwent two months of training covering fundamentals of C/UNIX/Java and concepts of Software Testing. My tasks include end to end functional & security testing of web applications, writing test scripts and their execution on a monthly release cycle, collaborating with the on-shore team and keeping them updated about the progress.

I am involved in the newsletter team and have **developed a full fledged AJAX based newsletter web portal**, which is released on a monthly basis.

I am also involved in active *development of a Demand Management Application* which is a cloud based solution to facilitate the resource staffing record maintenance activities, it'll be an Access application hosted on MS SharePoint server.

Freelance Web Developer
